Recipe Setup Service

Recipes are a powerful unlock for profitability, but manually adding them into MarginEdge can be tedious. Our Recipe Setup Service saves you time and hassle so you can get back to your team and your guests.

How it works

We only need two things to get started:

1. A point of contact to keep things running smoothly

2. Your digital recipes (PDF, Microsoft Word, Excel, etc.)

With those in hand, you can sit back and relax. Our team of experts will build your recipes for you, and in no time you'll be able to:

- **Get up-to-date recipe costs** — costs are updated as invoices are processed (plus see recipe cost history)

- **Display recipes in the kitchen** — photos and videos of prep techniques keeps everything consistent

- **Manage recipes centrally** — multi-unit groups can choose to make a recipe change across all locations or restrict changes to a single location

Pricing and timing

We like to keep things simple — $5 per recipe set up.

Number of Recipes	1-249	250-399	400+
Turnaround time	2 weeks	3 weeks	Let's chat!

> **With MarginEdge's recipe tool, we can actually feel confident that we're making money on our items.** In the past, we would have just scrambled to put something together and it would have taken hours in excel to actually figure something like that out."
